

Debt Buyer MODULE

BEAM provides unparalleled visibility into your portfolio data and gives you real-time insight and control, online reporting, and comprehensive debt buying and sale information. Detailed audits on the progress of outsourced accounts are easy and accessible in real time through your organization's secure BEAM web portal.

From portfolio selection to agency management - and everything in between - BEAM allows you to streamline your business processes and helps you make strategic, revenue-generating choices based on measurable and quantifiable information.

Integrated Tools

Readily identify potential purchases and effectively manage your ventures and SPVs.

Payout Rules

Create & track sophisticated payout rules that use netback, IRR targets, and flat-fee or percentage-based distributions.

Real-Time Metrics

Easily track performance metrics using BEAM's Synchronization Suite and extensive library of portfolio reports.

Inventory Control

Effectively manage portfolio outsourcing, recourse, recalls, putbacks and agency keeps.

Why choose BEAM?

- Manage your relationships with investors, buyers, sellers, attorneys, and agencies.
- Track performance metrics and provide portfolio performance reporting to your audience.
- Streamline the debt buying and selling process.
