

InfoSync

BEAM'S INFOSYNC

Beam's InfoSync feature synchronizes consumer and account information between Clients and their Agencies in real-time as updates are made. This aids the collection effort by ensuring that both parties are working with the most current information about the debt and helps keep those efforts in compliance with the regulatory environment.

Knowledge is Power!

Gain the advantage that comes with having the most accurate and up-to-date information about your consumers and their accounts.

Increase Revenue

Time is money and InfoSync can significantly reduce the amount of time your staff spends in searching for relevant information about their consumers enabling them to concentrate on collecting.

Peace of Mind

Stay ahead of the ever-changing regulatory requirements and ensure that your collection efforts remain in compliance.

Inspire Confidence

Better account data means better talk-offs. Empower your collection staff by giving them the certainty that comes from access to the latest consumer and account information.

Why choose Beam?

- Synchronize important account information with your agency or client
- Maintain an ongoing record of account changes in real-time
- Give your staff a competitive collection advantage

Intuitive • Compliant • Modular
