PaymentSync

BEAM'S PAYMENT SYNCHRONIZATION

Our PaymentSync feature enables Clients and Agencies using Beam's platform to synchronize payments and postdates in real-time as they are recorded on the account. This enhancement allows the maintenance of accurate and consistent account balance information between debt buyers, servicers and agencies.

Know your account revenue in real-time!
When PaymentSync is activated for your outsource agency, you will see their payments and postdates in your system instantly.

Concise reporting of synchronized payments and postdates
Beam's templated reports provide you with up-to-date information on the liquidation of your agency placements. Track portfolio performance easily for more effective account management.

Clear visibility into account performance
Beam's PaymentSync enables you to compare the liquidation ratios of your various agencies on a daily basis so that you can make timely decisions on where to place your portfolios and forecast future liquidation goals.

Remove the Guesswork!
One of the biggest impediments to success in our industry is a lack of timely knowledge regarding your portfolios' performance. Beam's PaymentSync eliminates the hassle caused by delays in collection reporting. You no longer have to wait for the remittance to know how your agency is performing.

Why choose Beam?

- Easy, seamless payment reconciliation between clients and agencies
- No waiting for critical account performance information
- Increased account knowledge means increased revenue generation

Intuitive • Compliant • Modular
